

ClinixSucess™

Proactive clinical supply risk evaluation and tailored strategies to support on-time study start-up for small and mid-sized sponsors

Each clinical supply project carries its own unique risks, as no two studies are exactly alike. Certain study characteristics can be leading indicators of project complexity, and are typically found in protocol design, study scope, drug characteristics and sponsor resources. Implementing an integrated and thoughtful approach to a study start up, as well as a proactive strategy to prevent issues, is essential. Clinical Supply Management (CSM) is the first line of defense in developing a sound execution plan.

ClinixSucess™ by Renejix uses an intelligent scoring methodology to evaluate your project's unique complexity and potential risk factors to provide you with the tailored support and integrated clinical supply services you need to get your study off to the right start, manage your IMP efficiently, and ensure continuity of supply from beginning to end.

BENEFITS

- Fill internal knowledge and resource gaps - we become an extension of your team to help you plan and execute effectively
- Deploy a tailored and integrated solution that fits the needs of your study
- Reduce your risk of clinical supply related delays and budget overruns through better planning
- Experience the ease and continuity of working with a single provider vs. multiple vendors

Evaluating Project Complexity

Determine the appropriate level of startup and ongoing CSM support based on your project's anticipated complexity with Renejix's CSM experts. Renejix examines nearly 20 common objective and quantifiable study characteristics known to drive project complexity.

Proactive Resourcing

Renejix provides sponsor companies with clinical supply management services designed to help reduce overall project risk. Focusing on successful study start-up and issue prevention is particularly important for sponsors who may be unfamiliar with or lack previous experience evaluating and managing clinical supply complexities that can occur during a trial. With ClinixSuccess™, we make it our goal to provide you with the appropriate level of project support and the correct tailored mix of services from start to finish

Additional Services Available To Support Your Project Include:

- Comparator Sourcing
- Blinding/Masking/Over-Encapsulation
- Package Design and Engineering
- Primary/Secondary Packaging and Labeling
- Global Storage and Distribution
- Import/Export and Regulatory Expertise
- Returns and Destruction
